### 1.3 Correct working of product

For the correct working of product Rollycarp Steamer Cooker Elettric you must to do attention at these **IMPORTANT ADVICE**

- **NEVER** start work without a water
- Use demineralized water , preferably hot water
- Finish work let out water for the bottom caps

The time work vary in base of the water temperature used .  
If use hot water allows a current and time saving.

The cooking times of bait may vary depending on the diameter of bait in cooking, in detail a 15mm bait will cook in less time compared to a 24mm bait.

To have a regular and uniform cooking in all baits insert a product when the thermostat signed range 90 / 100 °C

Donit use the steamer Cooker Gas in places where there are gasoline, paint and / or flammable materials. Use the steamer Cooker Gas only in rooms with adequate ventilation
